DS-65
FOLD, INSERT, SEAL IN ONE SEAMLESS PROCESS

The best choice for small and medium-size businesses

neopost

DS-65

FOLD, INSERT, SEAL
IN THREE EASY STEPS

The DS-65 sets a new standard in mail processing. Whether you are running checks, invoices, statements, business correspondence or transactional mail, the DS-65 is the best choice for a wide variety of applications. The user interface is designed for simplicity, making it easy for users in any department to select and run their jobs in just three easy steps.

Sensors are used to track and monitor the paper and envelope path of the folder inserter to ensure your envelopes are inserted with precision. When processing your documents or mailings with variable pages, the DS-65 ensures that our state-of-the-art reading technology reads the barcodes on the document. In this way, we make sure your envelopes are inserted with full integrity, each and every time.

The DS-65 is equipped with everything you need to process your common business applications. Customization is as easy as adding one or two optional feeders, now or in the future. The DS-65 produces professional looking mail pieces every time, while you concentrate on other important tasks in your organization. Now that's efficiency.

FILL YOUR ENVELOPES QUICKLY AND EFFICIENTLY

1 LOAD YOUR DOCUMENTS

Automatic document feeders. Up to 2 feeders with a capacity of 250 documents each

Automatic BRE/card feeder with a capacity of 250 BREs or up to 700 cards, depending on thickness

Semi-automatic document feeder
- Stapled mail sets
- Varying page count sets
- Individual mail sets

2 LOAD YOUR ENVELOPES

Load up to 250 envelopes in the envelope hopper

3 PRESS START

Our intuitive operator menus, in combination with a full color touch screen, make the DS-65 very easy to set up and run

THE MAIL SOLUTION FOR HANDLING VARIABLE PAGES

Customer mailings that have a variable number of pages are time consuming when sorted by hand. The DS-65 processes multi-page invoices and statements automatically. By adding a barcode to your document, the DS-65 can collate the correct number of pages and insert them into your envelope.

Are you concerned that your confidential information will go to the wrong recipient? Our barcode solution ensures that the correct documents go into the right envelopes.

Don't know how to add a barcode on your document? We have designed a software tool, OMS-100, which can add a barcode in a few simple steps. Neopost's OMS-100 software uses your print file and adds the barcode prior to printing the document.
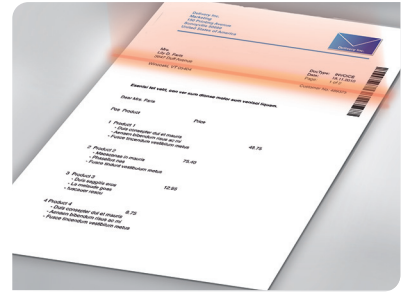

TAILOR THE DS-65 TO MATCH YOUR NEEDS

Every DS-65 is outfitted with standard features and technology to enhance the performance of your mail process. Optional feeders are available to tailor your system and match your mail applications.

Full color touch screen
Automatic water level detection

OPTIONAL
Automatic document feeder
Automatic BRE/Card feeder
Reading technology
  • Optical Mark Recognition (OMR)
  • Barcode Reading (BCR)

COMMITMENT TO THE ENVIRONMENT

• Energy – No more wasted energy thanks to the automatic Standby Mode. This feature saves more than 50% of the yearly energy consumption.
• Raw Material – With the DS-65, Neopost has succeeded in combining efficiency and versatility in a compact and low weight product design. The weight is 25% less compared to a product of comparable functionality. Lower weight means a lower carbon footprint due to less transport weight.
• Packaging – Due to the efficient packaging design, the transported volume has been reduced to the minimum. As such, fewer trucks and containers are needed to transport the DS-65 to customers around the world, which significantly contributes to the reduction of the carbon footprint.
